**Full- Stack Developer**

**437 973 2998**

A dynamic professional seeking a robust career opportunity in a progressive environment where I can implement and augment my knowledge and skills.

## **SUMMARY**

- Result oriented professional with 8+ years of professional experience in a variety of programming languages, writing, production quality, professional code with a focus on web application development.
- Proficient in developing and optimizing software solutions that elevate operational efficiency and align seamlessly with business objectives.
- Strong front-end development to develop products of the highest quality through strict attention to visual and interaction details. Creating responsive mobile first applications.
- Experience participating in Agile and SCRUM methodologies to provide estimates/design/grooming/planning and continuous improvement initiatives.
- Ability to learn new technology quickly, and passion for continual improvement and ability to effectively lead/drive change. Following coding guidelines & peer level reviews.
- Demonstrated expertise in problem-solving, coupled with a proactive approach to contributing innovative ideas.

## **TECHNICAL SKILLS**

- Languages: JavaScript, Typescript.
- Frameworks/Libraries: ReactJs, NextJs, NodeJs, ExpressJs, Redux, Redux Tool Kit, Angular 2-15, NGRX, RxJS, Redux-Thunk/Saga, React Hooks, Bootstrap4, Tailwind,
- Version Control: GitHub, GitLab, Bit Bucket.
- Web Technologies: HTML/HTML5, CSS/CSS3, SASS, SCSS, LESS, JavaScript ES-6, jQuery, AJAX, JSON, WCAG 2.0, StoryBook, Observable.
- Analytics and Testing: Data Structures and Algorithms, Google Analytics, Protractor, Mocha, Jest, Enzyme, React-Testing, Karma, Jasmine
- Build Tools: Webpack, NPM, Babel, WebWorker.
- Databases: MongoDB, Firebase, Cassandra, Appwrite.
- Continuous Integration/Deployment: CI/CD: Jenkins

## **PROFESSIONAL EXPERIENCE**

**Senior React JS / Frontend Software Developer**

**Apr 2019 – Present**

**Cencora (Innomar Strategies) | Oakville, ON**

**TechStack**:NextJs,ReactJs,JavaScript,NodeJs,Redux,ExpressJs,Tailwind,Jasmine,Typescript,StoryBook,SASS,HTML5

- Modernizing Communication Analysis and Review System which helps users to improve productivity by 30%.
- Creating new customer and employee-facing applications using the latest technologies.
- Participate in design-thinking sessions, daily stand-ups, retrospectives, sprint planning, and sprint reviews.
- Experience in Application design using Object Oriented Methodologies and Data Structure and Algorithm and help junior developers with peer programming and code reviews.
- Proficient in writing tests for React components using React Testing Library and Enzyme.
- Strong understanding of the principles of test-driven development (TDD) and how to apply them effectively in React projects.
- Effectively applying TDD principle within the environment.
- Experience with AODA, WCAG and ARIA implementation, and accessibility best practices.

## **Senior React, Angular / Frontend Web Developer**

**July 2016 – Mar 2019**

**Generali Global Health Services I Thornhill, ON**

**TechStack:** React, Javascript, Angular11, RxJS, Node.JS, ExpressJS, MongoDB, Mongoose, KeystoneJS, SASS, HTML5.

- Created modular, scalable, well-tested, stable, and optimized React Component Library, which is being utilized across the application to deliver a delightfully functional and intuitive user experience.
- A content management system (CMS) is built for internal users to use, edit, and customize information as per their needs.
- Developed and configured the Core System Integration Services, resulting in improvement in data retrieval speed.
- Participate in specification, design, implementation, as well as improve existing features and product performance. Following coding guidelines and involved in peer level reviews.

## **React JS / Frontend Software Developer**

**Aug 2015 – Mar 2016**

**Skylines Infotech**

**TechStack:** Javascript, React, BootStrap, CSS3, HTML5, JAVA1.8, Hibernate, SOAP, RestAPI, WebServices, MySQL, Jasmine, Jenkins,

- Manage quote pricing systems for the TEBT application, efficiently managing counters. Employed logical thinking and effective verbal communication skills to devise solutions that identified valuable daily log patterns and optimized quote claims.
- Successfully developed and maintained ReactJS applications, leveraging modern frameworks and libraries to deliver responsive and user-friendly interfaces.
- Extensive experience in building RESTful APIs, ensuring seamless data integration between front-end and back-end systems, and handling large concurrent user loads.

## **EDUCATIONAL QUALIFICATION**

- Bachelor of Science, India.
